sister Gul

its very easy

first read the thesis paper of all other people who have done research...on the related subject

at the end of every thesis...sources are written then u can get infromation, material easy

thesis are available in every library section

but that is a very detail and long studies

secondly, you must get favour,support of some senior teachers bcz they have to approve your thesis if any of them reject your thesis

you will not be ableto get approved

thirdly, if you work under, or showing how much seriously you are working for your research other teachers defintly get inspired even they are not willing to sort you they will support you

lastly, thats all your own effort you may get alot of material but you have to write in your own simple way not a copy paste,,,,,

Best of Luck,,,

ur sis

EDUCATIONAL Topics ON RECENT ISSUES??

---

you want to say , a thesis topic, you want to  
select from educational issue

when i was student i selected 4 or 5 topic,  
but due to shortage of time i dropped my thesis idea

rather i studies...other subjects equalent to thesis

ok.....back to your topic

Educational problems are

Co.education ? that is the current topic which is being  
studied by foreigners and muslims in the light of Islam

you may understand what i want to say

its problems,benefits etc

my thesis topic which was considered best, but i rejected in  
end to do thesis on it

That the heart favourite topic which was liked by my  
head of the department, he took material from me to  
publish in his University Magazine

the topic is  
" Westernization of Muslim Culture"  
or  
Attack on Muslim Culture

now up to you how to handle

you can understand, now a days, three dimensional attack  
we are facing, Indians,,West,,Media  
ok.....Go ahead.....Best of luck  
from your sister
