
Subject: Sending Bulk Business Newsletters

Posted by george_k_allis - 2008/08/24 09:38

I wonder if someone know from where I can get a sending bulk business newsletter from my PC or hosting account, in fact, user received newsletter with their individual name and email. The application may contain following options:

Add Automatically Person Name in newsletter:
Add Automatically Person Email Address:
Add Automatically Remove option from the list

I would appreciate if any one of you could be of my help.
